Office Action Summary	Application No. 10/717,367	Applicant(s) LARSON, TIMOTHY E.	
	Examiner Brian K Kauffman	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The use of the trademarks ESERVER, INTELLISTATION, WINDOWS XP, JAVA, and BLUETOOTH has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Objections

Claims 13-21 are objected to because of the following informalities: claims 13-21 recite a "method of claim 11" and a "method of claim 12". However, these claims are all dependent upon independent claim 11, which claims a system. Further, claims 13-21 recite no method steps but rather recite structure only. The examiner recommends replacing the word "method" in each claim with the word "system".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3765

Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Tomita et al. (6,457,429). In regard to claims 1-10, Tomita discloses a method for updating stitch data in a storage device using a wireless connection comprising: receiving a command to update the stitch data in the storage device; determining if the storage device is currently in use; logically disconnecting the storage device from a stitching device; transferring new stitch data from a source system to the storage device via a wireless connection; updating the stitch data in the storage device with the new stitch data; reconnecting the storage device to the stitching device (col. 9, lines 58-67 and col. 10, lines 1-8).

In regard to claims 11-21, Tomita discloses a system for updating stitch data in a storage device using a wireless connection comprising; a stitching device (fig. 1, m); a storage device connected to the embroidery machine (col. 5, 43-48); a source system having stitch data, wherein the stitch data is transferred to the storage device in response to a command to update the stitch data in the storage device (col. 9, lines 58-67 and col. 10, lines 1-8).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Akira et al. (2004/0083022) discloses an embroidery device connected to a network via wireless connection. Price (6,295,481) discloses a control system for an automatic sewing station that utilizes flash memory. Muto (6,202,001) discloses an embroidery data creating device for creating embroidery stitch data that utilizes flash memory.
